

# BIRD CHECKLIST ORINOCO LODGE

---

**The Vichada's department** has 250 kilometers of the Orinoco River, between the mouth of the Guaviare River and the Meta River.

Almost all of its course is navigable, except for the areas of the Atures and Maipures streams, which were considered by Humboldt as the eighth wonder of the world.

The weather in PNN El Tuparro has typical characteristics of tropical climates: a marked seasonality of precipitation and a relative uniformity of temperatures throughout the year. Therefore, the climate is bimodal with a rainy season between April and November and a dry season between December and March.

**There are about 650 species in Orinoquia.** The richness and variety of birds in this area is due to the multiplicity of plants and insects present in their environment.
